

# R Mark

Lucía Bettin

16/5/2020

## R Markdown

This is an R Markdown document. Markdown is a simple formatting syntax for authoring HTML, PDF, and MS Word documents. For more details on using R Markdown see <http://rmarkdown.rstudio.com>.

When you click the **Knit** button a document will be generated that includes both content as well as the output of any embedded R code chunks within the document. You can embed an R code chunk like this:

```
summary(cars)
```

```
##      speed      dist
##  Min.   : 4.0    Min.   :  2.00
## 1st Qu.:12.0    1st Qu.: 26.00
##  Median :15.0    Median : 36.00
##   Mean  :15.4    Mean   : 42.98
## 3rd Qu.:19.0    3rd Qu.: 56.00
##   Max.  :25.0    Max.    :120.00
```

```
plot(cars)
```

## Including Plots

You can also embed plots, for example:

```
pressure
```

```
##      temperature pressure
## 1           0    0.0002
## 2          20    0.0012
## 3          40    0.0060
## 4          60    0.0300
## 5          80    0.0900
## 6         100    0.2700
## 7         120    0.7500
## 8         140    1.8500
## 9         160    4.2000
## 10        180    8.8000
## 11        200   17.3000
## 12        220   32.1000
## 13        240   57.0000
## 14        260   96.0000
## 15        280  157.0000
## 16        300  247.0000
## 17        320  376.0000
## 18        340  558.0000
```

```
## 19          360 806.0000
```

```
plot(pressure)
```

Note that the `echo = FALSE` parameter was added to the code chunk to prevent printing of the R code that generated the plot.

## Hola

```
122221
```

(1)

```
print("Hello wourld")
```

```
## [1] "Hello wourld"
```

```
-Bullets  
-Hola  
-Que tal  
-dd  
-Conocerte  
-muñeca  
- no puede ser
```
